

Slide 1

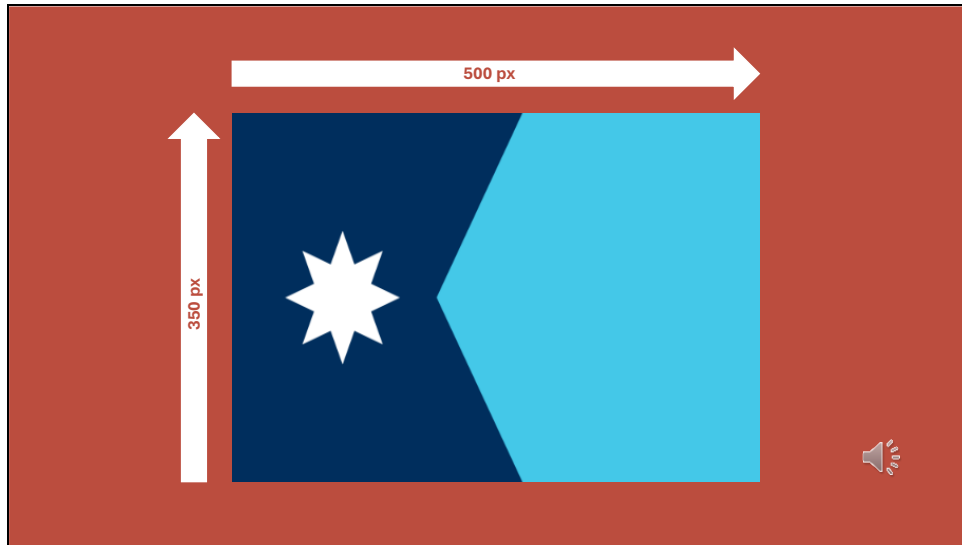

Want to turn a state, regional or provincial flag into a stylish pattern necktie? How about your favorite football team's banner?

In this tutorial, I'll show you how to prepare your flag image and upload it into our pre-set template to instantly create your own repeating flag pattern tie.

Hi, I am David from MyTies.net.

Your custom flag pattern necktie is just a couple of clicks away. For this tutorial we'll be using Minnesota's recently redesigned state flag.

Slide 2

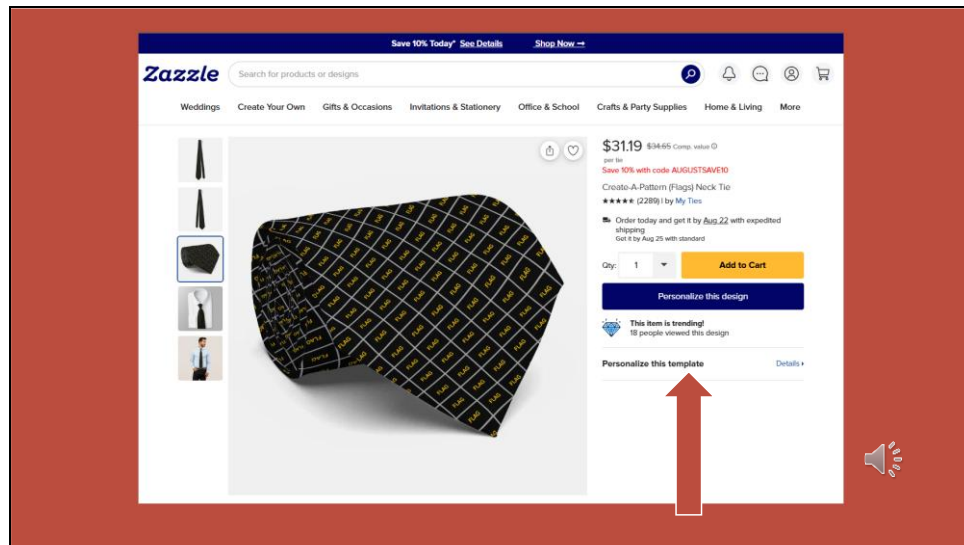

Before uploading, make sure your file is the right size.

The ideal dimensions are **500 pixels wide by 350 pixels tall**—or the same proportions, which is a **5 to 3.5 ratio**.

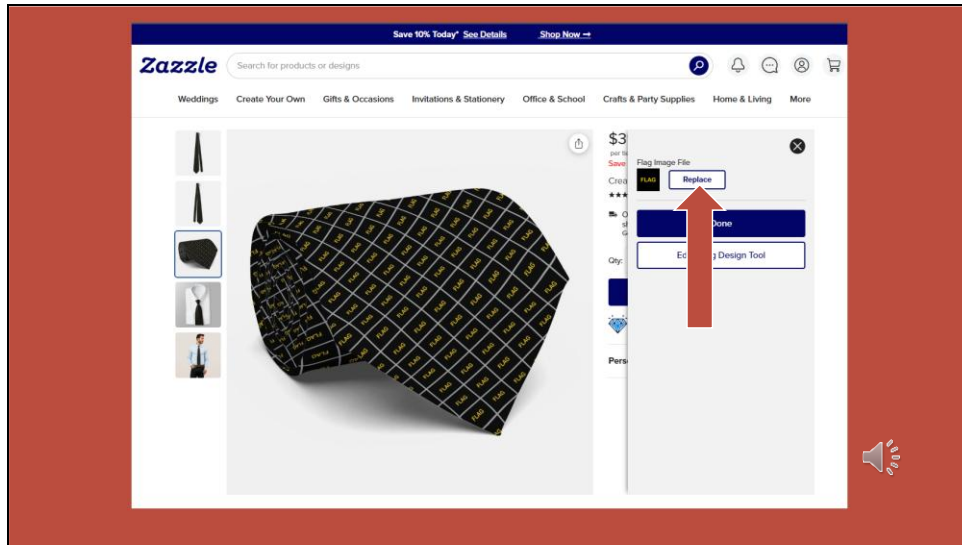

Crop the flag tightly, leaving no margins around the edges. This ensures the pattern fills every tile cleanly, without any white borders showing.

Slide 3

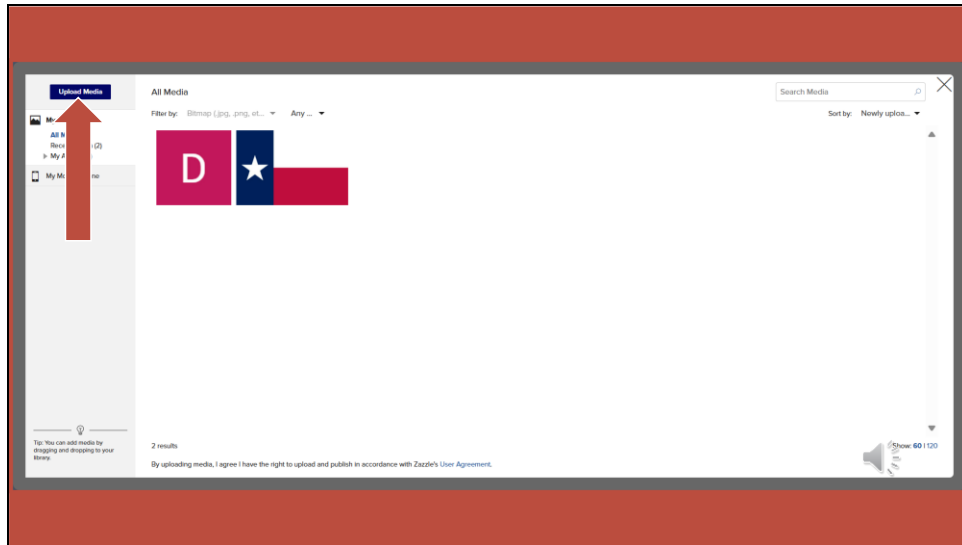

From the Create-a-Pattern (Flags) necktie product page, click on the **Personalize this Template** link.

Slide 4

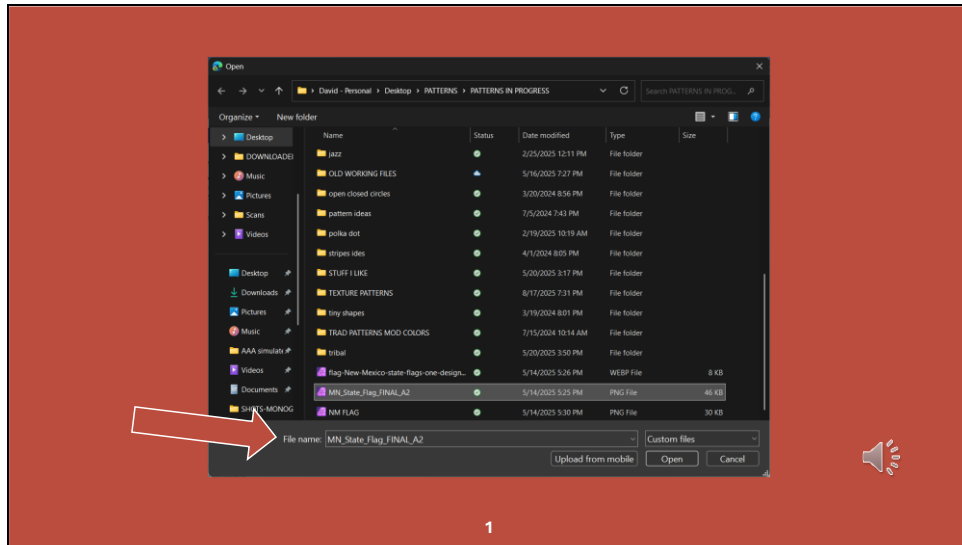

Click on the **Replace** button.

Slide 5

Click **Upload Media**.

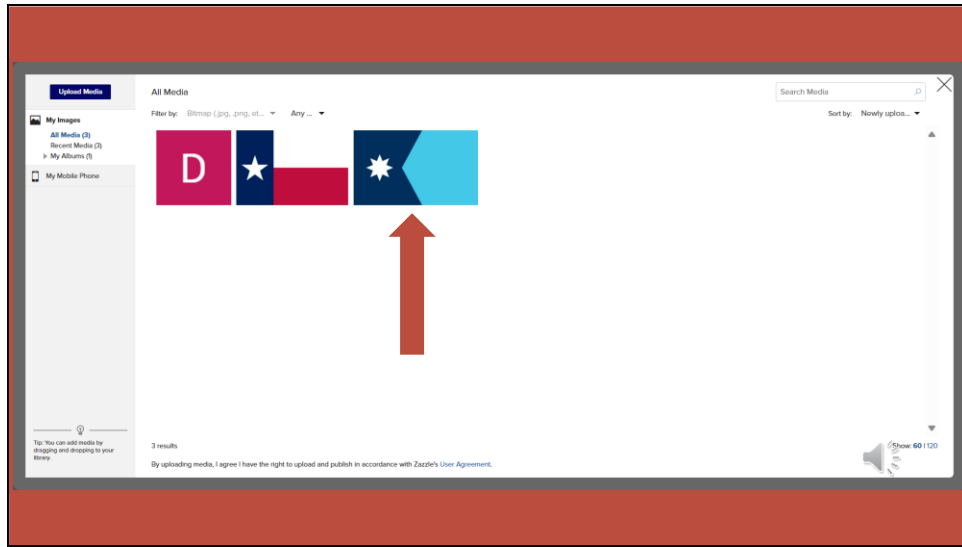

Slide 6

1

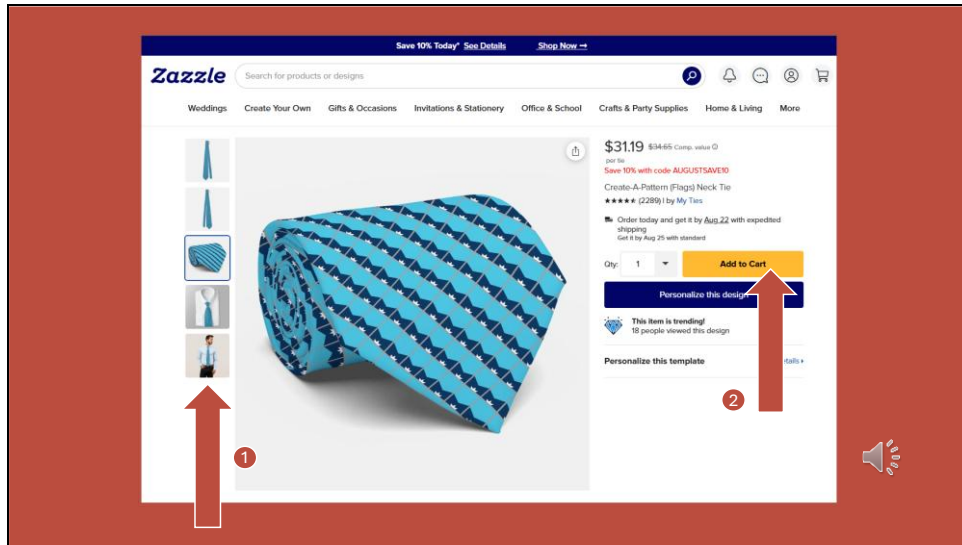

Select the flag image file on your computer and upload it.

Slide 7

Select The flag image file you just uploaded.

Slide 8

Preview your custom flag pattern necktie! Click ADD TO CART to place order.

That's it, you've created a custom pattern necktie in just a couple of minutes.

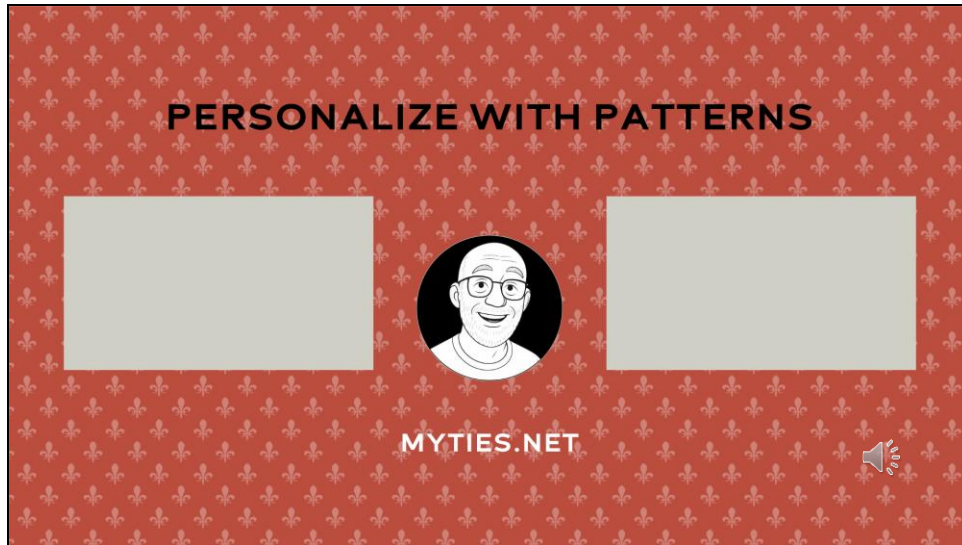

Quick Tips

- 500 px by 350 px flag image file
- Or same proportions (5:3.5 ratio)
- Crop tightly, leave no margin

For a seamless experience creating your custom flag necktie, upload a flag image file that is 500 pixels by 350 pixels, or a file of the same proportions. Crop it tightly, leaving no margin.
